

# Disconnectors

CG has been a name to reckon with in the global electrical arena. We bring all our products with leading edge technology which supplement the existing CG range of switchgear products in order to complete the scope of the substation equipment such as outdoor off load disconnector.

We started manufacture and supply of the isolators from the year 2005 and within a short span of time we have made our presence felt worldwide. We are exporting disconnector products to almost 32 countries.

Description	Type	Rated Voltage	Rated Current	Standards
<a href="#"><u>Horizontal Centre Break Disconnectors</u></a>	HCB	Up to 420 kV	200 to 3150 Amps	IEC,IS
<a href="#"><u>Horizontal Double Break Disconnectors</u></a>	HDB	Up to 420 kV	200 to 3150 Amps	IEC,IS
