SF6 - GAS CIRCUIT BREAKERS FOR OUT-DOOR USE (245KV)

Crompton Greaves have been the leader in the field of MV & EHV circuit breakers in India for the last more than 20 years. CGL offer their clients a wide range of circuit breakers in SF6 technology, from 24kV to 240kV with fault levels ranging upto 40A.

CGL now introduce their new 245kV circuit breaker with motor wound spring closing and spring tripping mechanism to give their customers a choice to select either a pneumatic mechanism or a spring operated mechanism.

The salient features of CGL 245kV GCB with spring operated mechanism are :

- **Simple & compact design'**
- **Ease of assembly at site**
- **No adjustments required at site**
- **Both tripping and closing spring located outside pole units**
- **Low noise level**
- **Low maintenance**
